Eliminates Odors

Specifically formulated to eliminate cigarette smoke odor from furniture, carpet, walls and upholstery.

The one that works!

- Concentrate 128oz (3.79L)
- Concentrate 16oz (474ml)

ODORCIDE®

210 CONCENTRATE

CIGARETTE SMOKE

Not a mask. Not an enzyme.

Background

Residue and odor from burning tobacco products can accumulate on a variety of building surfaces and materials. Left untreated, these odors can actually intensify and become worse over time. Odorcide® Cigarette Smoke works through a process of counteraction and absorption to safely, but effectively eliminate the odor. Sold as a concentrate, Odorcide® Cigarette Smoke is diluted with water and applied using sprayer and fogger applications.

Uses

- Designed to work in tank or trigger sprayers on small affected areas or materials such as drapery, upholstery, furniture, etc.
- Can be used in wet fogging systems in rooms or large areas that have been affected by tobacco smoke.
- In vehicle interiors as a spray to eliminate tobacco smoke odor from seats, fabric and the heater/air conditioning system.

Directions for Use

Sprayer Application

Add 2-4 oz of concentrate to 1 gallon of water. Apply directly to surfaces affected by tobacco smoke. It is important to ensure that Odorcide® Cigarette Smoke reaches the odor source at a concentration equal to or greater than the source of the odor. Absorbent cloth materials must be saturated to guarantee the solution reaches the malodor. If possible, allow the items to air dry (fans or dryers can be used to accelerate the process). Repeat, if necessary, to effectively reach the odor source in all areas.

Fogger Systems

Remove all unattached items such as drapes, rugs, furniture, etc. from the affected area and treat with Odorcide® Cigarette Smoke according to the directions below. Close all windows & doors, cover any sensitive items that can't be removed and turn on the central heating/air conditioning system. Dilute product per instructions and add to the fogger, carefully following the directions supplied with the unit. Insure all people and pets are out of the area.

Recommended Settings:

- Small Rooms – low setting
- Large Rooms – low or medium setting with fans
- Large Rooms – high setting if not using fans

Fans help force Odorcide® Cigarette Smoke into cracks and crevices where the odor source may be difficult to treat. The length of time fogging depends on the severity of the smoke and the size of the affected area. The concentration can also be varied depending on the severity of the odor.

Vehicles

Dilute 2-4 oz per gallon of water into a trigger sprayer. Lightly spray onto interior surfaces of the vehicle and into the exhaust ports/vents of the heating/air conditioning system. Allow to air dry and use fans if possible. Repeat, if necessary, to eliminate any remaining odor. As with other applications, Odorcide® Cigarette Smoke must reach the odor source at a concentration equal to or greater than the smoke odor source.

Product Safety

All Thornell products are safe for use on any surface. As with any product, follow the label directions. Contains water, proprietary essential oil blend and preservatives.

Keep out of the reach of children. For external use only.

Cautions

Effectiveness decreased when using with Chlorine solutions. Always spot test for color fastness.
